KM. 10 Idiroko Road, Canaan Land,
Ota, Ogun State, Nigeria*

Dear Sir/Ma,

LETTER OF IMPACT FOR THE COVENANT APPLIED INFORMATICS & COMMUNICATION AFRICA CENTER OF EXCELLENCE

I am Dr. Jules Raymond Kala of the STEM Faculty at the International University of Grand Bassam, Bassam, Côte d'Ivoire. I am writing to confirm the impact your center, Covenant Applied Informatics and Communication – Africa Centre of Excellence (CapIC-ACE) has had on my research group at the International University of Grand Bassam. My research group has an active collaboration with Prof Emanuel Adetiba, and my group is conducting research in the field of Data science application to utilities. Most of our study has been based on our personal computers but now we are venturing into the actual testing of our models on high-performance computing, Thanks to our collaboration with Prof E. Adetiba of the CapIC-ACE. He has provided us with the opportunity to train our models on high-performance computing.

The role of CapIC-ACE through Prof. E. Adetiba is invaluable as this collaboration has opened up the possibility for us to create more complex and accurate machine learning models. This collaboration with CapIC-ACE through Prof. E. Adetiba has also made us more confident in the models we are designing.

I would like to express my profound gratitude to Covenant Applied Informatics and Communication – Africa Centre of Excellence CapIC-ACE and Prof. E. Adetiba for their immense contribution towards the success of our research efforts and look forward to a more robust engagement with the centre as we continue to work with Prof. E. Adetiba.

Best regards.

Dr. Jules Raymond Kala, kala.j@iugb.edu.ci, +2250170030309
